3. MAINTENANCE

- Very little maintenance is required, but regular checks should be made to ensure the structural integrity of the stand. The lathe is heavy and should the stand sustain structural damage, it could collapse/overbalance if not properly repaired/replaced.
- 3.1.1 Periodically check the stand for rust.
- 3.1.2 Occasionally remove the lathe and check the nuts & screws within the stand. Ensure they are all present, intact and tightened.
- 3.1.3 Regularly check the stand for dents, distortion and signs of misuse.
- 3.1.4 For information regarding repairs/replacement contact your authorised Sealey dealer.
