2. INTRODUCTION

Essential tool for extinguishing the service indicator and resetting Electronic Parking Brake on Land Rover and Range Rover vehicles. Simple push button operation allows EPB cable to be released and re-attached and, in the event that the emergency hand brake has been activated, allows the user to reset the system, and clears codes that may have been generated as a result of the emergency cable being pulled. It also allows the EPB to be un-jammed when the vehicle has entered a state of brake screech when applying the parking brake, where the rear brakes squeak or rub when the vehicle is moving or there is evidence of shoe-drag.
